Licensing overview

Components and types of deployment

SecureEdge Manager	SecureEdge Service			SecureEdge Access Agent	SecureEdge Site Device		Secure Connector	SD-WAN Connector
	Private	SaaS	Azure		Hardware	Vx		
management portal	cloud-based security enforcement			endpoint agent	on-premises appliance		IoT connectivity appliance	server connectivity agent
Free of charge	Site devices	Bandwidth-based	Marketplace	User-based	Energize Updates	Energize Updates	Energize Updates	Free of charge

SecureEdge Manager

This cloud-based management user interface is activated with the first SecureEdge order and is free-of-charge. It enables central management of all Barracuda SecureEdge components in an organization's network.

SecureEdge Service

This component is required only for SD-WAN setups. For all other use-cases, this is an optional component that is provided either as Barracuda SaaS Service, or hosted in a regional Azure Virtual WAN hub or on-premises (i.e., private cloud deployment).

- **Private Edge Service:** For a private deployment or on-premises deployment of the SecureEdge Service, a SecureEdge site device can be promoted to be a Private Edge Service. A site device (either hardware or virtual) with a valid Energize Updates subscription is required for such a setup.
- **Edge Service:** The Software-as-a-Service approach is deployed via a fully managed SaaS service, provisioned/licensed in 50Mbit increments up to 1 Gbit.
- **Edge Service for Virtual WAN:** In an Azure-integrated deployment, this component runs on SaaS licensing and ordering, licensing, and payment process is run directly within Microsoft Marketplace. From a performance-based point of view, the license is available for a variety of scale units (from 2-80) with aggregated bandwidths between 1 and 40 Gbps.

SecureEdge Access Agent

SecureEdge Access Agent provides secure access to any SaaS or private application regardless of where they are hosted, following the zero-trust principles. Zero Trust Network Access (ZTNA) provides users with the least privileged access to business applications, minimizing business risk.

The SecureEdge Access Agent is available for all desktop and mobile platforms, providing consistent security and ZTNA functionality. Licensing is user-based and covers up to 5 devices per user (also for simultaneous use). It is also possible to license just a subset of users for SecureEdge Access.

SecureEdge Site Device

This on-premises component of SecureEdge can be run as hardware or virtual appliance - available in several different model specifications. From a licensing perspective, customers can run the site device either on BYOL or SaaS (a.k.a. Pay-As-You-Go) schemes.

Please note that —as for all Barracuda products— an active Energize Updates subscription is mandatory for every appliance (hardware or virtual).

For site devices, cold spares are available via hardware only or PAYG licensing schemes.

For detailed specifications, please see [SecureEdge Specifications](#).

Secure Connector for IoT environments

For IoT environments, Barracuda provides purpose-built connectivity appliances with minimal footprint and DIN-rail compatibility. For harsh environment, rugged hardware models are available.

For detailed specifications, please see [SecureEdge Specifications](#).

SD-WAN Connector

This free-of-charge component of a SecureEdge deployment allows to connect any cloud or local site running Windows or Linux Services or Servers for direct application access via agent and/or SD-WAN-based access. SD-WAN connectors must be used in combination with either a site device or Edge Service (or a combination thereof).

Additional hardware subscriptions

SecureEdge Site Devices	Hardware								
	Desktop		1U Rack mount			DIN Rail compatible			
	T100	T200	T400	T600	T900	T93	T193	SC2	SC3
AVAILABLE SOFTWARE/FEATURE SUBSCRIPTIONS									
Energize Updates (EU)	Mandatory								
INCLUDED HARDWARE SUBSCRIPTIONS									
Warranty Extension (WE)	included in EU		included in EU			included in EU		optional	optional

Energize Updates

Barracuda Energize Updates help you secure your investment in the ever-changing IT world. Benefit from security updates to patch or repair any security vulnerabilities, keep your Barracuda product up-to-date and fully functional at all times, and get access to our award-winning support.

An active EU subscription is mandatory for all SecureEdge hardware and virtual models. Available on a monthly basis or as SaaS.

Energize Updates includes:

- Enhanced support, which includes email and phone support 24x7 in the US (Pacific Time), Japan, China, Austria, and the United Kingdom time zones
- Firmware maintenance which includes new firmware updates with feature enhancements and bug fixes
- Security updates to patch or repair any security vulnerabilities
- Optional participation in the Barracuda early release firmware program

Warranty Extension

This subscription provides an extended warranty, and ships a replacement unit on the next business day (best effort) with standard mail upon notification of a failed unit.

Renewing a WE subscription is only available with a hardware refresh after 48 months.

For all hardware models, except SC2 and SC3 appliance, this subscription is included with an active EU subscription.

Licensing Examples

Zero Trust Access on SaaS scheme via Barracuda

Requiring one Barracuda SaaS SecureEdge Service with 200 Mbps and 500x user licenses for zero trust access via SecureEdge Access.

Item	SKU	Quantity	Duration	Ordering via	Payment via
SecureEdge Service SaaS	SEP-ES-50MBPS-1M	4	12 months	Barracuda	Barracuda
SecureEdge Access Agent	SEP-SEACCESS-Usr-1M	500	12 months	Barracuda	Barracuda

Secure SD-WAN including Zero Trust Access on BYOL scheme

Requiring one private SecureEdge Service on VT3000, 20x T400 for office locations, and 1,400 user licenses for zero trust access via SecureEdge Access.

Item	SKU	Quantity	Duration	Ordering via	Payment via
SecureEdge VT3000	CGW-VT3000	1	-	Barracuda	Barracuda
Energize Updates for VT3000 (BYOL)	CGW-VT3000-EU-1M	1	36 months	Barracuda	Barracuda
SecureEdge T400	CGW-T400C	20	-	Barracuda	Barracuda
Energize Updates for T400 (BYOL)	CGW-T400-EU-1M	20	36 months	Barracuda	Barracuda
SecureEdge Access Agent	SEP-SEACCESS-Usr-1M	1,400	36 months	Barracuda	Barracuda

Secure SD-WAN including Zero Trust Access on SaaS scheme via Microsoft Azure

Requiring four Azure Virtual WAN hubs of scale unit (SU) 2, 6x T200 for offices, and 250x user licenses for zero trust access via SecureEdge Access.

Item	SKU	Quantity	Duration	Ordering via	Payment via
Microsoft Azure Virtual WAN + hub	n/a	4 (one per region)	-	Azure Marketplace	Azure Marketplace
SecureEdge Service	n/a	4x 2 SU	-	Azure Marketplace	Azure Marketplace
SecureEdge T200	CGW-T200C	6	-	Barracuda	Barracuda
SecureEdge Access Agent	SEP-SEACCESS-Usr-1M	250	12 months	Barracuda	Barracuda
